Portfolio: https://thejshn.github.io/ | https://www.linkedin.com/in/johnson-taiwo-75b100235/

SUMMARY

Data Analyst with practical experience in product analytics, business intelligence, dashboard development, and data pipeline implementation. Proficient in SQL, Python, Tableau, AWS, Grafana Cloud, and GitHub, with hands-on experience in event tracking, funnel analysis, cohort analysis, KPI reporting, and data visualisation. Skilled in transforming raw data into actionable insights, monitoring product performance, and supporting data-driven business decisions..

EXPERIENCE

DATA & PRODUCT ANALYST INTERNS | SFx (Financial Technology)

6-Month Internship | July 2026 - December 2026

- Designed an event tracking plan and analytics taxonomy for SFx Lite during the initial month, establishing a structured framework for capturing, validating, and analysing user interactions.
- Extended analytics implementation and event tracking across the SFx Money application, monitoring user journeys, engagement, and product performance.
- Instrumented core product events covering user registration, Know Your Customer (KYC) verification, deposits, and first transactions to enable user behaviour analysis and conversion tracking.
- Developed SQL views to transform raw event data into structured datasets for Key Performance Indicator (KPI) reporting, conversion funnel analysis, weekly cohort analysis, and product performance monitoring.
- Designed and deployed interactive Business Intelligence (BI) dashboards using Grafana Cloud to visualise user engagement, conversion rates, operational metrics, and product performance.
- Implemented additional event tracking for administrative KYC reviews and AI chatbot operations, including failure monitoring and usage-cost analysis.
- Evaluated initial product funnel performance immediately after deployment, capturing 23 user registrations, 15 completed KYC verifications, and 7 first transactions, establishing a baseline signup-to-first-transaction conversion rate of 30.4%.
- Monitored AI chatbot usage expenditure, recording approximately $0.12 in cumulative costs during the reporting period.

- Identified a spike in chatbot failures through analytics monitoring and traced the root cause to a missing API key in the production environment, helping uncover an operational issue through data-driven investigation.

DATA ANALYST INTERN | UPTRAIL Ltd. - HOLBORN, UK

August 2025 – September 2025

- Analysed user behaviour data to deliver insights for monthly Business Intelligence reviews
- Produced sales and customer behaviour analysis that informed strategic planning decisions
- Developed a churn prediction model identifying high-risk customers, supporting targeted retention strategies
- Identified regional delivery bottlenecks through data wrangling and visualisation, recommending process improvements
- Built interactive Tableau dashboards analysing 13,000+ sales by product, region, and customer segment, improving reporting efficiency for monthly BI reviews
- Translated complex analytical findings into executive-ready reports with actionable recommendations

PROJECT

AWS DATA PIPELINE FOR SALES DATA ANALYSIS

Technologies: AWS S3, AWS Glue, Amazon Athena, SQL, IAM, Parquet

- Automated ingestion and transformation of 13,000 sales records using AWS S3, Glue, and Athena
- Built ETL workflows in AWS Glue, converting raw datasets into Parquet format to improve query performance and storage efficiency
- Queried and validated datasets in Amazon Athena using SQL to ensure data accuracy and integrity
- Configured IAM roles to implement secure and controlled data access
- Demonstrated end-to-end cloud data processing, transformation, and validation

EDUCATION

Bachelor of Applied Science in Management Information Systems

Girne American University | March 2023 - Expected Completion: January 2027

Expected Graduation: June 2027

CERTIFICATION

Data Analyst Certification of Completion - UPTRAIL Ltd

September 2025

- Applied SQL, Excel, Tableau, and Python to real-world data projects.
- Performed data cleaning, statistical analysis, and data visualisation.
- Developed dashboards and reports to support data-driven decision-making.

SKILLS

TECHNICAL SKILLS

- SQL: Advanced SQL (Joins, CTEs, Aggregations, Window Functions)
- Python: Pandas, NumPy, Data Cleaning and Data Analysis
- Cloud & Data Engineering: AWS (S3, Glue, Athena), ETL, Data Pipelines
- Business Intelligence & Visualisation: Tableau, Power BI, Grafana Cloud
- Data Management: Excel, Data Validation, Data Transformation
- Product Analytics: Event Tracking, Funnel Analysis, Cohort Analysis, KPI Monitoring
- Development Tools: Git, GitHub
- Machine Learning: Fundamentals of Predictive Modelling

PROFESSIONAL SKILLS

- Analytical Thinking and Problem-Solving
- Business Intelligence and Data Storytelling
- Data-Driven Decision-Making
- Communication and Team Collaboration
- Critical Thinking and Attention to Detail
